## The Selem Center Grand Opening!

### THE SELEM CENTER

is proud to introduce:

### AQUALIPO™...

Liposuction is one of the top 3 cosmetic procedures performed in the United States. Joseph Selem, M.D., at The Selem Center is proud to introduce a new revolutionary liposuction technique Aqualipo™. The combination of using a

water assisted device (Bodyjet™) together with laser liposuction (skin tightening), results in this innovative procedure Aqualipo™. This procedure can be completed in-office, under local anesthesia, with no downtime, no more lumps and bumps, and virtually no swelling or bruising.

"My patients drive themselves to the office and drive

themselves home after the procedure," says Dr. Selem. "They can return to work the next day."

This new procedure makes traditional liposuction a thing of the past. There is no need for a doctor to aggressively thrust a metal rod in and out of someone to remove unwanted fat. Aqualipo™ is non-traumatic and a gentle alternative to tradi-

tional liposuction procedures. Please visit: [www.theselemcenter.com](http://www.theselemcenter.com) to learn more about this exciting procedure and others offered at The Selem Center.

Dr. Selem provides free consultations to discuss the best options to help achieve the most desired results.
